Subject: Agenda Item #14C: Opposition Ltr to SB 79

EXTERNAL EMAIL - This email was sent by a person from outside your organization. Exercise caution when clicking links, opening attachments or taking further action, before validating its authenticity.

Dear Mayor Candell, and Councilmembers McCormick, Dawson, Cervantes, and Anduri, and Staff,

I just wanted to offer my support of the opposition letter to Senate Bill 79 (Wiener), that the City of Lafayette is sending on behalf of its residents, and I know that the VAST majority of my neighbors and all the people in Lafayette are in full support of opposing this very egregious bill.

This bill would upzone any area in Lafayette that has a bus line, regardless of the frequency of the transit on that line; for example, Upper Happy Valley and Happy Valley Roads would be 100% impacted, because there is a bus that travels through it once a day on weekdays. That would mean that 100% of all the home lots in UHV and HV would be up-zoned for building up to 65 foot high apartment complexes, because SB 79 seeks to up-zone ANY area within a quarter mile radius of ANY bus line. I am not familiar with other bus lines in Lafayette, other than one that goes down Moraga Road into Moraga, but regardless, this bill needs to be defeated, and NOW!

As some of you know, I have been following the "housing legislation" that has been introduced in our state legislature for about the past five years. There have been many, many bills that are very bad, and literal attacks on the cities, and the residents of California. None of the housing legislation, nor any of the rhetoric that you may hear, has any basis in FACT. Almost all of the bills, if you read them, use the phrase "we have a severe housing shortage in CA"; that statement is simply, 100% false, but it is being used by a very well-funded YIMBY campaign to push through a lot of this legislation. When I say "well-funded", I mean that CA YIMBY is 100% funded by the wealthy billionaire class of high tech corporate land investors and land developers, like Zuckerberg, Musk, Bezos and Blackstone. Mark Zuckerberg was the original funder and founder of CA YIMBY. He also is the number one funder of the Terner Center, the so-called "housing policy institute" in Berkeley, where much of the misinformation about this "housing crisis" began. I want to include this information for the sake of clarity, as I think a lot of people do not know the facts of the case when it comes to the "housing crisis" in California. And by the way, of note is that Housing Action Coalition is, of course, a YIMBY backed group; the organization that is suing the City of Lafayette for "breaking the law" on their HE.

This SB 79 would basically make Housing Elements of any kind totally irrelevant, because the up-zoning would be "automatic" - under state jurisdiction, not by cities. I am still trying to figure out why Scott Wiener puts his name on so many of these egregious bills, and the common factor that I see is that he wants to attack cities; I mean, literally attack them! He apparently has a deep-seated hatred of suburbs; why is something I cannot fathom. But I do know that he does not seem to care how many cities' rights or how many citizens' rights he violates with his bills; this bill is another example of that, taking away cities' rights to govern and make planning and zoning decisions; taking away our individual rights to freedom of choice of where and how we live. This bill, as well as so many other bills, wants to degrade our quality of life for an unsubstantiated claim.

Another FACT that the legislature is completely ignoring, even though it was brought to light in a CA Dept of Finance report in 2023 - is that, despite their constant claims of growth - the opposite is happening. California has lost almost one million people since 2017, so the rationale for all of this push for housing production is just simply false. This is according to the U.S. Census; I did not make it up. AND, again, from the Dept of Finance

report, the trend of population growth is false; that in fact, we are declining in population, and will do so and level out in our "growth" until the year 2060. So why, when you see that there are 1.7 million vacant/unoccupied (U.S. Census) housing units in CA at present, why do the legislators keep saying that we need more housing?

I wanted to direct attention to the latest NBER report (National Bureau of Economic Research) that came out recently that completely refutes the idea that the "law of supply and demand" is the "solution" to affordability. In fact, the supply/demand does NOT apply, because we HAVE no shortage. This report also finds that the YIMBY narrative is not, and will not, work, in solving the housing affordability problem, #1) because 95+% of what is being built and projects on the pipeline are market rate, not affordable; #2) the report concludes that increasing supply does NOT equate to affordability in housing.

So, I just want to again, thank the City Council for taking a stand on this bill and opposing it, just as I also want to thank the Staff and the City Council for going forward with "vigorously" defending our city in this very malicious and frivolous lawsuit filed by an organization that has no stake in our city whatsoever. I have to wonder why they are doing this, and why it is not being thrown out of the courts for no grounds. I know why they are doing it - the old "because they can" deal, but only because, again, they are being funded by the very wealthy high tech corporates, who are in turn funding the wealthiest lobby up in Sacramento, and several of those bills, including SB 79, are actually written by the real estate development lobby, and legislators like Scott Wiener want to put their name on them. Oh, and I just want to remind people that those same people are the ones who just financed Donald Trump's return to the White House. I know people want to "remain nonpartisan" on many things, but the thing I am trying to point out here is that this is pure corruption, and it seems to be on both sides of the aisle; those billionaires do not care who is in power, as long as they can be bought.

And so goes our democracy, our rights, our freedoms, and whatever else we all thought we were entitled to as Americans. I, personally, am in favor of democracy, especially over fascist rule, whether it is on the national OR the state level. We DO have the right to fight back, and I am very glad that the City of Lafayette is taking a stand on SB 79. And I hope the trend continues; I am happy to assist the legislative team (Susan and Jim) with any updates on legislation that affects local control, as I am tracking a number of bills that fall into that category.

So, keep up the good work, and keep the faith. I believe that the TRUTH will out and maybe this is a perfect opportunity to 'wake up" the legislature to the fact that their housing legislation is a complete overreach for cities, and all the unfunded mandates are just setting cities up to fail. And that is NOT why they were elected to represent us. I, myself, am very tired of cities being "punished" for not being able to do what the state is FORCING us to do, while sacrificing all of our rights and our vote, without ANY funding whatsoever in ANY mandates.

And for those of you who have "bought in" to the YIMBY narrative, you should be aware that this "housing crisis" was declared WITHOUT consensus from the people, AND it was NEVER substantiated - NO statistics, NO data, NO studies, NO examples, NOT one piece of evidence to show that there is a shortage of housing in this state (or in this country); the reason they did not present any evidence is because there IS none. It is a false statement; a LIE. And for those of you with short memories, it is the exact parallel to a certain entity now in the WH, who claimed that "because he did not win, there MUST have been election fraud." Well, sixty courts asked for this evidence, and not one received any evidence; reason being, because there WAS no fraud. FACT: he LOST. Same here - NO evidence has ever been presented that there is this "severe shortage" of housing in CA. The reason being - because that is NOT true, and the FACTS support that there is an incredible surplus.

In that surplus, there are many homes that are being used as "land investments" by the wealthy, and THAT is one of the factors driving up the price of housing in California; NOT because we don't have enough. But they

keep repeating and repeating the BIG LIE, and for some reason, people believe it without proof. Does that sound at all familiar?? We have people in Congress who still stand by the Trump lie that there was election fraud in 2020, with a few million conspiracy theorists who continue to parrot that narrative. Not being truthful is very dangerous to our society and our way of life, whether it is on the national level, or the state. We have an Attorney General who, like Attorneys General of "red" states who criminalize women and POC for seeking healthcare; Bonta seeks to "go after cities" (his words exactly) if they don't comply; and he has "deputized" these private groups to do just exactly what HAC is doing to Lafayette. He is criminalizing cities for not being able to do what they cannot do, and all cities will fail their HEs in time, because the housing goal is unattainable. Period.

I know that I go on and on. But this is information that all city council members really and truly need to know and understand. Everything I have said is true and backed by the facts from reliable sources - the U.S. Census, the Ca Dept of Finance; the NBER. What I am hoping also is that you will persuade our sister cities of Moraga and Orinda to submit a letter by the deadline as well (noon, April 16).

Thanks for reading, and for opposing SB 79!

Subject: Agenda Item #14C: Opposition Ltr to SB 79

Dear Mayor Candell and Council members:

I support Libby's letter below, and can add little to what she cites except to re-iterate that adding density is how developers INCREASE the value of their properties and higher density combined with new construction always increases the cost of housing. People don't come here for tiny homes which is how some people claim they are building affordable housing without any government subsidies. The real sad fact is that the legislators are trying to attack the unique features which drew most of here to live - green hills (visible from the roads not hidden by rows of high rise buildings), larger homes with yards for the kids to play, and semi-rural winding roads which give you a distinct country feel that is not found in the urban centers nearby.

I support your opposition of SB79 and have written my sentiments to the legislators as well.

Thank you.

Robert Lavoie
